Performance data quoted represents past performance which is no guarantee of future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than what is stated. To view performance current to the most recent month-end, and for after tax returns, contact us or visit FederatedInvestors.com.

* The Adviser and its affiliates have voluntarily agreed to waive their fees and/or reimburse expenses so that total annual fund operating expenses (excluding acquired fund fees and expenses, if any) paid by Class IS and Y Shares (after the voluntary waivers and/or reimbursements) will not exceed 0.56% and 0.38% respectively, up to but not including the later of 8/1/12 or the date of the fund's next effective prospectus.

A WORD ABOUT RISK

Bond prices are sensitive to changes in interest rates and a rise in interest rates can cause a decline in their prices.

Interest income from the fund's investments may be subject to the federal alternative minimum tax for individuals and corporations (AMT), and state and local taxes.

DEFINITIONS

The holdings percentages are based on net assets at the close of business on 12/31/11 and may not necessarily reflect adjustments that are routinely made when presenting net assets for formal financial statement purposes. Because this is a managed portfolio, the investment mix will change.

Total return represents the change in value of an investment after reinvesting all income and capital gains. Total return would have been lower in the absence of temporary expense waivers or reimbursements.

The 30-day yield for Institutional Shares is calculated by dividing the net investment income per share for the 30 days ended on the date of calculation by the maximum offering price per share on that date. The figure is compounded and annualized. The 30-day yield for Class Y Shares was 2.07%. For an indefinite period of time, the investment adviser is waiving all or part of its fee and, in addition, may reimburse the fund for some of its expenses. Otherwise, the yield would have been 1.43% for Institutional Shares and 1.67% for Class Y Shares.

Weighted average effective maturity is the average time to maturity of debt securities held in the fund.

Weighted average effective duration is a measure of security's price sensitivity to changes in interest rates. Securities with longer durations are more sensitive to changes in interest rates than securities of shorter durations.

The S&P Municipal Bond Intermediate Index (formerly S&P/Investortools Municipal Bond Intermediate Index) consists of bonds in the S&P Municipal Bond Index ("Main Index") with a minimum maturity of three years and a maximum maturity of up to, but not including, 15 years as measured from the Rebalancing Date of the Main Index. The Main Index is a broad, comprehensive, market value-weighted index following approximately 55,000 bond issues that are exempt from U.S. federal income taxes or subject to the alternative minimum tax (AMT). Indexes are unmanaged and cannot be invested in directly.

** The ratings agencies that provided the ratings are Standard and Poor's, Moody's and Fitch. When ratings vary, the highest rating is used. Credit ratings of A or better are considered to be high credit quality; credit ratings of BBB are good credit quality and the lowest category of investment grade; credit ratings BB and below are lower-rated securities ("junk bonds"); and credit ratings of CCC or below have high default risk. The credit quality breakdown does not give effect to the impact of any credit derivative investments made by the fund.

RATINGS AND RATING AGENCIES

Lipper Averages represent the average total returns reported by all mutual funds designated by Lipper, Inc. as falling into the respective categories indicated and do not reflect sales charges.
