Performance data quoted represents past performance which is no guarantee of future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than what is stated. To view performance current to the most recent month-end, and for after tax returns, contact us or visit FederatedInvestors.com. Maximum Offering Price figures reflect the maximum sales charge of 4.5% for Class A Shares, and the maximum contingent deferred sales charges of 5.5% for Class B Shares and 1% for Class C Shares. See the prospectus for other fees and expenses that apply to a continued investment in the fund.

*** Waivers/reimbursements are voluntary. The Adviser has agreed not to terminate these waivers and/or reimbursements until after 01/31/10.**

Investors should carefully consider the fund's investment objectives, risks, charges and expenses before investing. To obtain a prospectus containing this and other information, contact us or visit FederatedInvestors.com. Please carefully read the prospectus before investing.

Past performance is no guarantee of future results.

U.S. portfolio composition is primarily comprised of non-U.S. dollar denominated, high grade debt securities issued by corporations and quasi governmental agencies. These holdings include bonds registered in the United States which are issued by foreign corporations or U.S. based corporations. The fund typically does not hold any U.S. dollar denominated bonds.

A WORD ABOUT RISK

Mutual funds are subject to risks and fluctuate in value.

International investing involves special risks including currency risk, increased volatility, political risks and differences in auditing and other financial standards. Prices of emerging markets securities can be significantly more volatile than the prices of securities in developed countries, and currency risk and political risks are accentuated in emerging markets.

Bond prices are sensitive to changes in interest rates and a rise in interest rates can cause a decline in their prices.

DEFINITIONS

The holdings percentages are based on net assets at the close of business on 12/31/09 and may not necessarily reflect adjustments that are routinely made when presenting net assets for formal financial statement purposes. Because this is a managed portfolio, the investment mix will change.

Total return represents the change in value of an investment after reinvesting all income and capital gains. Total return would have been lower in the absence of temporary expense waivers or reimbursements.

The 30-day yield for Class A Shares is calculated by dividing the net investment income per share for the 30 days ended on the date of calculation by the maximum offering price per share on that date. The figure is compounded and annualized. In the absence of temporary expense waivers or reimbursements, the 30-day yield would have been 0.82%. Yields for other classes will vary.

Growth Over Time performance is for the fund's Class A Shares. Figures do not reflect the 4.5% maximum sales charge. The fund offers additional share classes whose performance will vary due to differences in charges and expenses.

Weighted average effective maturity is the average time to maturity of debt securities held in the fund.

Weighted average effective duration is a measure of security's price sensitivity to changes in interest rates. Securities with longer durations are more sensitive to changes in interest rates than securities of shorter durations.

J.P. Morgan Global (ex-U.S.) Government Index is the standard unmanaged foreign securities index representing major government bond markets. Indexes are unmanaged and cannot be invested in directly.

The ratings agencies that provided the ratings are Standard and Poor's, Moody's and Fitch. When ratings vary, the highest rating is used. Credit ratings of A or better are considered to be high credit quality; credit ratings of BBB are good credit quality and the lowest category of investment grade; credit ratings BB and below are lower-rated securities ("junk bonds"); and credit ratings of CCC or below have high default risk. The credit quality breakdown does not give effect to the impact of any credit derivative investments made by the fund.

RATINGS AND RATING AGENCIES

Lipper Averages represent the average total returns reported by all mutual funds designated by Lipper, Inc. as falling into the respective categories indicated and do not reflect sales charges. Data Source: Lipper, A Reuters Company. Copyright 2010© Reuters. All rights reserved.

Morningstar Style Box™ reveals a fund's investment strategy. For fixed-income funds the vertical axis shows the average credit quality of the bonds owned, and the horizontal axis shows interest rate sensitivity as measured by a bond's duration.

Morningstar Category identifies funds based on their actual investment styles as measured by their underlying portfolio holdings over the past three years. If the fund is less than three years old, the category is based on the life of the fund. ©2010 Morningstar, Inc. All Rights Reserved.
