Performance data quoted represents past performance which is no guarantee of future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than what is stated. To view performance current to the most recent month-end, and for after tax returns, contact us or visit FederatedInvestors.com. Maximum Offering Price figures reflect the maximum sales charge of 4.5% for Class A Shares, and the maximum contingent deferred sales charges of 5.5% for Class B Shares and 1% for Class C Shares. See the prospectus for other fees and expenses that apply to a continued investment in the fund. If shares are redeemed or exchanged within 90 days of purchase, a 2% redemption fee will be charged. The redemption fee will be paid to the fund and is reflected in the offering price total returns.

* The Adviser and its affiliates have voluntarily agreed to waive their fees and/or reimburse expenses so that total annual fund operating expenses (excluding acquired fund fees and expenses) paid by Class A, B and C Shares (after the voluntary waivers and/or reimbursements) will not exceed 1.23%, 1.99% and 1.99% respectively through the later of 5/31/11 or the date of the fund's next effective prospectus.

** The ratings agencies that provided the ratings are Standard and Poor's, Moody's and Fitch. When ratings vary, the highest rating is used. Credit ratings of A or better are considered to be high credit quality; credit ratings of BBB are good credit quality and the lowest category of investment grade; credit ratings BB and below are lower-rated securities "junk bonds"; and credit ratings of CCC or below have high default risk. The credit quality breakdown does not give effect to the impact of any credit derivative investments made by the fund.

A WORD ABOUT RISK

Mutual funds are subject to risks and fluctuate in value. High yield, lower-rated securities generally entail greater market, credit/default and liquidity risks, and may be more volatile than investment grade securities.

Bond prices are sensitive to changes in interest rates and a rise in interest rates can cause a decline in their prices.

DEFINITIONS

The holdings percentages are based on net assets at the close of business on 6/30/10 and may not necessarily reflect adjustments that are routinely made when presenting net assets for formal financial statement purposes. Because this is a managed portfolio, the investment mix will change. Holdings are high yield debt securities.

Total return represents the change in value of an investment after reinvesting all income and capital gains. Total return would have been lower in the absence of temporary expense waivers or reimbursements.

The 30-day yield for Class A Shares is calculated by dividing the net investment income per share for the 30 days ended on the date of calculation by the maximum offering price per share on that date. The figure is compounded and annualized. In the absence of temporary expense waivers or reimbursements, the 30-day yield would have been 7.30%. Yields for other classes will vary.

Growth Over Time performance is for the fund's Class A Shares. Figures do not reflect the 4.5% maximum sales charge. The fund offers additional share classes whose performance will vary due to differences in charges and expenses.

Weighted average effective maturity is the average time to maturity of debt securities held in the fund.

Weighted average effective duration is a measure of security's price sensitivity to changes in interest rates. Securities with longer durations are more sensitive to changes in interest rates than securities of shorter durations.

Index classifications are based upon, and individual portfolio securities are assigned to, the classification and sub-classification categories of the Barclays Capital High Yield 2% Issuer Capped Index (BCHY2%ICI).

Individual portfolio securities that are not included in the BCHY2%ICI are assigned to an index classification category at the discretion of the fund's advisor.

Barclays Capital U.S. High-Yield 2% Issuer Capped Bond Index is an index that includes all fixed income securities having a maximum quality rating of Ba1, a minimum amount outstanding of \$150 million, and at least 1 year to maturity. The Index has a maximum exposure of 2% per issuer. The index is unmanaged and can not be invested in directly. The Barclays Capital U.S. High-Yield 2% Issuer Capped Bond Index is maintained by Barclays Capital. Indexes are unmanaged and cannot be invested in directly.

RATINGS AND RATING AGENCIES

Lipper Averages represent the average total returns reported by all mutual funds designated by Lipper, Inc. as falling into the respective categories indicated and do not reflect sales charges.
