Performance data quoted represents past performance which is no guarantee of future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than what is stated. To view performance current to the most recent month-end, and for after tax returns, contact us or visit [FederatedInvestors.com](http://FederatedInvestors.com). Maximum Offering Price figures reflect the maximum sales charges of 4.5% for Class A Shares and 1% for Class F Shares, and the maximum contingent deferred sales charges of 5.5% for Class B Shares, 1% for Class C Shares and 1% for Class F Shares. See the prospectus for other fees and expenses that apply to a continued investment in the fund.

\* Expenses include 0.01% of indirect expenses of acquired funds in which the fund invests. Waivers/reimbursements are voluntary. The Adviser has agreed not to terminate these waivers and/or reimbursements until after 01/31/10.

### A WORD ABOUT RISK

International investing involves special risks including currency risk, increased volatility, political risks and differences in auditing and other financial standards. High yield, lower-rated securities generally entail greater market, credit/default and liquidity risks, and may be more volatile than investment grade securities. Bond prices are sensitive to changes in interest rates and a rise in interest rates can cause a decline in their prices.

### DEFINITIONS

The holdings percentages are based on net assets at the close of business on 12/31/09 and may not necessarily reflect adjustments that are routinely made when presenting net assets for formal financial statement purposes. Because this is a managed portfolio, the investment mix will change.

Total return represents the change in value of an investment after reinvesting all income and capital gains. Total return would have been lower in the absence of temporary expense waivers or reimbursements.

The 30-day yield for Class A Shares is calculated by dividing the net investment income per share for the 30 days ended on the date of calculation by the maximum offering price per share on that date. The figure is compounded and annualized. In the absence of temporary expense waivers or reimbursements, the 30-day yield would have been 5.59%. Yields for other classes will vary.

Growth Over Time performance is for the fund's Class A Shares. Figures do not reflect the 4.5% maximum sales charge. The fund offers additional share classes whose performance will vary due to differences in charges and expenses.

Weighted average effective maturity is the average time to maturity of debt securities held in the fund.

Weighted average effective duration is a measure of security's price sensitivity to changes in interest rates. Securities with longer durations are more sensitive to changes in interest rates than securities of shorter durations.

The fund's benchmark is a custom index comprised of four separate indexes which track various security types. The weightings assigned to each component index of the benchmark are fixed, but do not necessarily reflect the fund's allocation to the type of fixed-income securities represented by the component indexes, which will vary.

Barclays Capital Mortgage-Backed Securities Index is an unmanaged index composed of all fixed securities mortgage pools by GNMA, FNMA and the FHLMC, including GNMA Graduated Payment Mortgages. Barclays Capital High Yield 2% Issuer Constrained Index is the 2% Issuer Cap component of the U.S. Corporate High Yield Bond Index. Barclays Capital U.S. Corporate High Yield Bond Index is an unmanaged index that includes all fixed income securities having a maximum quality rating of Ba1, a minimum amount outstanding of \$150 million, and at least 1 year to maturity. Barclays Capital Emerging Market Bond Index (EMBI) tracks total returns for external-currency-denominated debt instruments of the emerging markets: Brady bonds, loans, Eurobonds, and U.S. dollar-denominated local market instruments. Countries covered are Argentina, Brazil, Bulgaria, Ecuador, Mexico, Morocco, Nigeria, Panama, Peru, the Philippines, Poland, Russia, and Venezuela. J.P. Morgan Non-Dollar Index is a total return, unmanaged trade-weighted index of over 360 government and high-grade bonds in 12 developed countries. Indexes are unmanaged and cannot be invested in directly.

The ratings agencies that provided the ratings are Standard and Poor's, Moody's and Fitch. When ratings vary, the highest rating is used. Credit ratings of A or better are considered to be high credit quality; credit ratings of BBB are good credit quality and the lowest category of investment grade; credit ratings BB and below are lower-rated securities ("junk bonds"); and credit ratings of CCC or below have high default risk. The credit quality breakdown does not give effect to the impact of any credit derivative investments made by the fund.

### RATINGS AND RATING AGENCIES

Lipper Averages represent the average total returns reported by all mutual funds designated by Lipper, Inc. as falling into the respective categories indicated and do not reflect sales charges.
