**A WORD ABOUT RISK**

Bond prices are sensitive to changes in interest rates and a rise in interest rates can cause a decline in their prices. The value of some mortgage-backed securities may be particularly sensitive to changes in prevailing interest rates, and although the securities are generally supported by some form of government or private insurance, there is no assurance that private guarantors or insurers will meet their obligations.

**DEFINITIONS**

The holdings percentages are based on net assets at the close of business on 12/31/09 and may not necessarily reflect adjustments that are routinely made when presenting net assets for formal financial statement purposes. Because this is a managed portfolio, the investment mix will change.

Total return represents the change in value of an investment after reinvesting all income and capital gains. Total return would have been lower in the absence of temporary expense waivers or reimbursements.

The 30-day yield for Institutional Shares is calculated by dividing the net investment income per share for the 30 days ended on the date of calculation by the maximum offering price per share on that date. The figure is compounded and annualized. The 30-day yield for Institutional Service Shares was 4.09%. For an indefinite period of time, the investment adviser is waiving all or part of its fee and, in addition, may reimburse the fund for some of its expenses. Otherwise, the yield would have been 4.10% for Institutional Shares and 3.62% for Institutional Service Shares.

Growth Over Time performance is for the fund's Institutional Shares. The fund offers an additional share class whose performance will vary due to differences in charges and expenses.

Weighted average effective duration is a measure of security's price sensitivity to changes in interest rates. Securities with longer durations are more sensitive to changes in interest rates than securities of shorter durations.

Barclays Capital Mortgage-Backed Securities Index is an unmanaged index composed of all fixed securities mortgage pools by GNMA, FNMA and the FHLMC, including GNMA Graduated Payment Mortgages. Indexes are unmanaged and cannot be invested in directly.
