

## GROWTH

### Fund Description

The fund seeks to provide investors with capital appreciation by investing principally in stocks of large companies that are reasonably priced and that exhibit positive, sustainable growth characteristics.

Performance data quoted represents past performance which is no guarantee of future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than what is stated. To view performance current to the most recent month-end, and for after tax returns, contact us or visit [FederatedInvestors.com](http://FederatedInvestors.com). Prior to January 2, 2008, the fund's initial seed capital was held as a cash position. In addition, the fund's adviser waived fees and reimbursed expenses. In the absence of these circumstances, performance would have been lower.

\* The Adviser and its affiliates have voluntarily agreed to waive their fees and/or reimburse expenses so that total annual fund operating expenses (excluding Acquired Fund Fees and Expenses) paid by the fund's Class K Shares (after the voluntary waivers and/or reimbursements) will not exceed 1.95% through the later of December 31, 2010 or the date of the fund's next effective prospectus.

### A WORD ABOUT RISK

Mutual funds are subject to risks and fluctuate in value. International investing involves special risks including currency risk, increased volatility, political risks and differences in auditing and other financial standards.

### DEFINITIONS

The holdings percentages are based on net assets at the close of business on 12/31/09 and may not necessarily reflect adjustments that are routinely made when presenting net assets for formal financial statement purposes. Because this is a managed portfolio, the investment mix will change.

Total return represents the change in value of an investment after reinvesting all income and capital gains. Total return would have been lower in the absence of temporary expense waivers or reimbursements.

Beta analyzes the market risk of a fund by showing how responsive the fund is to the market. The beta of the market is 1.00. Accordingly, a fund with a 1.10 beta is expected to perform 10% better than the market in up markets and 10% worse in down markets. Usually the higher betas represent riskier investments.

Russell 1000® Growth Index measures the performance of those Russell 1000 companies with higher price-to-book ratios and higher forecasted growth values. Indexes are unmanaged and cannot be invested in directly.

### RATINGS AND RATING AGENCIES

Lipper Averages represent the average total returns reported by all mutual funds designated by Lipper, Inc. as falling into the respective categories indicated and do not reflect sales charges.
