

ALTERNATIVE

Fund Description

The fund is an actively managed bear fund designed to help investors benefit from a declining stock market. Using a "bottom-up meets top-down" investment approach, the fund seeks capital appreciation through a combination of short sales of equity securities, market indices and futures as well as put options and long positions in stocks of gold and precious metals and mining companies, overlaid with a risk control process that seeks to limit losses in bull markets.

Performance data quoted represents past performance which is no guarantee of future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than what is stated. To view performance current to the most recent month-end, and for after tax returns, contact us or visit Federated-Investors.com. Maximum Offering Price figures reflect the maximum sales charge of 5.5% for Class A Shares, and the maximum contingent deferred sales charge of 1% for Class C Shares. See the prospectus for other fees and expenses that apply to a continued investment in the fund.

* The Adviser and its affiliates have voluntarily agreed to waive their fees and/or reimburse expenses so that total annual fund operating expenses (excluding Acquired Fund Fees and Expenses and Dividends on Short Positions) paid by the fund's Class A Shares and Class C Shares (after the voluntary waivers and/or reimbursements) will not exceed 1.76% and 2.51%, respectively, through the later of November 30, 2010 or the date of the fund's next effective prospectus.

Investors should carefully consider the fund's investment objectives, risks, charges and expenses before investing. To obtain a prospectus containing this and other information, contact us or visit FederatedInvestors.com. Please carefully read the prospectus before investing.

Past performance is no guarantee of future results.

The Federated Prudent Bear Fund is the successor to the Prudent Bear Fund, pursuant to a reorganization that took place on December 5, 2008. Prior to that date, the Federated Prudent Bear Fund had no investment operations. Accordingly, performance information shown for periods prior to December 5, 2008 is historical information for the former No Load Shares but has been adjusted to reflect the maximum sales charges and expenses applicable to the fund's Class A and C Shares.

A WORD ABOUT RISK

Federated Prudent Bear Fund regularly makes short sales of securities, which involves unlimited risk including the possibility that losses may exceed the original amount invested. The fund may also use options and future contracts, which have risks associated with unlimited losses of the underlying holdings due to unanticipated market movements and failure to correctly predict the direction of securities prices, interest rates and currency exchange rates. However, a mutual fund investor's risk is limited to one's amount of investment in a mutual fund. The fund may also hold restricted securities purchased through private placements. Such securities may be difficult to sell without experiencing delays or additional costs. Please see the prospectus for further details. Considering the increased risks, the fund may not be suitable for all investors.

Investments in gold and precious metals are subject to additional risks such as the possibility of substantial price fluctuations over a short period of time. Considering the risk, the fund may not be suitable for all investors.

Diversification does not assure a profit nor protect against loss.

DEFINITIONS

The portfolio composition percentages are based on net assets at the close of business on 12/31/09 and may not necessarily reflect adjustments that are routinely made when presenting net assets for formal financial statement purposes.

Total return represents the change in value of an investment after reinvesting all income and capital gains. Total return would have been lower in the absence of temporary expense waivers or reimbursements.

Growth Over Time performance is for the fund's Class A Shares. Figures do not reflect the 5.5% maximum sales charge. The fund offers additional share classes whose performance will vary due to differences in charges and expenses.

Beta analyzes the market risk of a fund by showing how responsive the fund is to the market. The beta of the market is 1.00. Accordingly, a fund with a 1.10 beta is expected to perform 10% better than the market in up markets and 10% worse in down markets. Usually the higher betas represent riskier investments.

S&P 500 Index is an unmanaged capitalization-weighted index of 500 stocks designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries. Indexes are unmanaged and cannot be invested in directly.
